Brief Profile

Factors Group is one of the largest manufacturers of dietary supplements, natural health products in the North America with manufacturing facilities in Canada and the United States. We have close to 700,000 square feet of space across nine locations in North America, housing offices, manufacturing and production facilities, laboratories, distribution centers, and extensive warehouses. Our manufacturing capabilities include softgel and two-piece hard-shell encapsulation, tableting, liquid and powder extraction, multi-ingredient aqueous granulations, and a liquid fill line.

We are actively exporting to over 70 countries worldwide and we are interested in expanding our business to more countries. Factors Group would like to explore potential avenues for collaboration, gain insights into the local business environment, and better understand the regulatory framework and market dynamics in the KSA.

Leading company in advanced airway management solutions

Mission: Revolutionize respiratory care through innovative technologies

Focus on patient comfort, safety, and improved outcomes

Products: O2Vent:

- Oral appliance for obstructive sleep apnea (OSA) treatment
- Custom-fit, adjustable device delivering CPAP treatment
- Promotes better sleep and improved quality of life

Health Espresso provides a collaborative, patient-centred platform for Allied Health professionals, Primary Physicians and Hospitals for a "One Patient, One Record, One Care Plan" approach to care, reducing service overlaps and gaps.

Smile's Health Data Fabric (HDF) is a comprehensive data management solution that uses open data standards (HL7v2, FHIR and others) to provide a modern architecture and a rich set of capabilities for healthcare enterprises embarking on their digital transformation journey.

Smile HDF's highly configurable interoperability platform enables organizations to integrate legacy systems, software solutions, data stores and healthcare related compliance protocols at regional scale and beyond. The Smile HDF serves as a key innovation accelerator with features like event-driven data endpoints, clinical reasoning decision support services and overall composability of the data fabric.

Enghouse Systems Limited is a leading global provider of enterprise software solutions serving a variety of distinct vertical markets. Its strategy is to build a larger and more diverse software company through strategic acquisitions and managed growth. Enghouse shares are listed on the Toronto Stock Exchange under the symbol ENGH. Further information about Enghouse may be obtained from the Company's web site at www.enghouse.com.

Advanced Home Care Solutions has been providing nursing and health care support services for over ten years to hospitals in British Columbia. The focus of the company over the last several years has been on

Canadian custom manufacturer of Hospital Architectural Solutions.

TeleVU (pronounced Tele-View) harnesses the power of AR and AI to build an ecosystem of connected IoT devices and applications to redefine access to specialized medical care, high-quality medical education and digital workflow management.

In clinical settings, our telepresence solution utilizes smart glasses and other IoT devices to connect clinical peers by providing a hands-free POV (Point Of View) and immersive experience utilizing AR (Augmented Reality), voice activation and AI (Artificial Intelligence).

At home, patients utilize our state-of-the-art handheld 4-in-1 vital signs monitor to measure, monitor, store and share their vital signs monitor with their care team.

Health Standards Organization (HSO) and affiliate Accreditation Canada (AC) are global, not-for-profit organizations united by a vision for safer care and a healthier world. For 60+ years, our people-centered programs and services have been setting the bar for quality across the health ecosystem. HSO develops standards, assessment programs and quality improvement solutions that have been adopted in over 12,000 locations across five continents. AC empowers and enables organizations to meet global standards with innovative programs that are customized to local needs. Together, we support the delivery of safe, high-quality care across the entire care continuum.

BioAro is a Biotech Company specializing Genomics, Artificial Intelligence, Blockchain Technologies, Precision Health, HealthSpan, and Longevity.

CardiAI is a BioTech company specializing in telemedicine platforms and medical devices such as 24 hr ABPM (www.BPAro.com is Health Canada Approved), At home blood testing for Cardiac biomarkers (troponin, NT-ProBNP, etc) using AI.

Novem Pharmaceuticals specializes in COLD CHAIN storage of Biopharmaceuticals and Pharmaceuticals, as well as distribution in Canada and we are looking at expansion into the Middle East and Asia.

PRIME HEALTH LTD IS A RAPIDLY GROWING NUTRITIONAL/DIETARY/FOOD/NATURAL SUPPLEMENTS MANUFACTURING COMPANY LOCATED IN VANCOUVER, BRITISH COLOMBIA, CANADA. PRIME HEALTH HAS MORE THAN 250 PRODUCTS APPROVED BY HEALTH CANADA. PRIME HEALTH LIMITED HAS ITS PRESENCE IN MORE THAN 30 COUNTRIES. Bowhead Health's Bowhead Navigator is a pioneering platform transforming cancer care. It smartly matches patients with tailored clinical trials using advanced algorithms, offering a personalized approach to oncology treatment. Bowhead's collaboration with leading medical institutions underscores their commitment to revolutionizing patient outcomes in precision oncology.

Wosler is at the forefront of revolutionizing the healthcare landscape through our innovative approach to telemedicine. Our mission is to address the critical issue of healthcare labour accessibility by leveraging cutting-edge technology to enhance the distribution and

TCE Group was established in 1992 to provide automation and engineering services to factories and processing plants. In 1999, we developed and launched the world's first virtual-online pharmacy system, then further developed a completely integrated mail-order pharmacy system which included healthcare consumerism, integrated order processing and a front-end website ordering interface. This drove development of other systems and products, including our proprietary predictive just-in-time (JIT) inventory system that turned inventory 62 times per year.

In 2005, TCE GROUP developed a pharmaceutical wholesale business based on this JIT inventory concept, demonstrating our expertise in business procedures and practices.

In 2011, the TCE GROUP patented a unique pharmacy kiosk system which integrated prescription ordering platforms (computer-, mobile- and kiosk-based) with back-end community and mail-order pharmacy systems, creating our innovative pharmaceutical delivery system. It was the precursor to our suite of PK+ Telehealth components.

Jumping to 2023, we've launched a medical second opinion platform that uses Speech-to-speech translation and AI generation of medical report utilizing IBM watsonx.ai imbedded technology that will save physicians 10-20 minutes per each patient encounter, as a result, patients avoid long wait times to see a doctor in a clinic or hospital.

The integration of our virtual systems and applications with IBM watsonX allow doctors and patients to cross language barriers. Doctors will also benefit from AI automated medical report generation, resulting in the ability to consult with more patients.

Also, integration of data from patients' remote monitoring devices into a centralized IBM-based DB2 database. Further analysis is done with IBM watsonx for detection and early intervention.

AIC Network- Consultant to TCE Group

AIC Network is a team of dedicated professionals who are passionate about helping businesses grow and prosper. With over 20 years of expertise in the region, and globally with a deep understanding of the unique challenges and opportunities the region offers, we provide strategic guidance and on-ground support to turn your expansion aspirations into reality.
